

our work: Airport Graphics Denver, LaGuardia & O'Hare

services used:

- Lambda duratrans printing**
- Vutek PressVu printing**
- Matte laminate**
- Digital retouching**

Our client had requested several ultra-wide format backlit images to install in airports across the country. To fill the order, P+R Group provided a seamless solution with our Lambda Duratrans and Vutek UltraView backlit vinyl. We produced one 135" x 83" Duratrans *Spectacular* and two 79" x 261" *Super Spectaculars* at Chicago's O'Hare Airport. At LaGuardia in New York, P+R Group printed a single seamless *Spectacular* on premium, heavyweight, backlit vinyl. All three airports received a series of three Lambda Duratrans images.
